### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance:

Independent claims 1, 6, and 10 renumbered to 1, 6 and 14; among other things; teach the limitations "automatically determining, updating, and indicating user access status whether each particular user of a plurality of users has accessed each document, displaying a status row bar in a view window of each user, and providing a user access status indication indicating the user access status for every user of each document in the status row bar, viewable by all users of the groupware wherein the indication is one of 'read', 'not read', and 'changed' for each user of each document" in a collaborative, groupware system. The invention includes means and steps for tracking user access status and displaying the user access status for all users of all documents as claimed. As shown in applicant's Figure 4, a grid of status rows depicting each and every document per user, viewable by all users of the groupware, collaborative system with the proper status indicators that tracks user actions and updates the status indicators accordingly.

#### The prior art does not teach the cited limitation.

The Stefik reference teaches multiple users viewing a document with progress and status indicators but does not teach user access status indicators of "not read" "read" or "changed." Applicant's Figure 4 is heavily relied upon to determine and indicate how the 'status row' is depicted and represented for each user of each document. The Stefik reference does not teach displaying user access status for all users of all documents as claimed. Stefik displays data status not user status.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
